It has never been a better time to consider undertaking study towards your Master of Education or begin Doctoral level research in Education or Health Sciences at the University of Canterbury.

Our new professors are world leaders in their fields and together with our other leading academics we have excellent mentors for you to begin study towards a Masters degree, undertake a Masters thesis, or begin a PhD in Education or in Health Sciences.

In the College of Education we have restructured the Master of Education degree to provide you with the option of completing your Degree with four courses and a Master’s thesis. The thesis option provides close mentoring and research supervision from one of our well qualified academics or professors and can be completed on a part-time basis. Many Masters courses are held during late afternoon and early evening while others are available by distance making study possible for working professionals.

We have outstanding facilities for our PhD and Masters thesis students and an excellent structured programme of mentoring and support to ensure a successful and exciting research experience.

We look forward to receiving your enquiries.

If you are interested in enhancing your education and embarking on a Masters degree or PhD study don’t delay. We welcome your enquiry.
Please feel welcome to email one of our leading professors and begin discussing your postgraduate study or research aspirations today!
UC College of Education Associate Professors:

**Assoc Prof Lindsey Conner**
Specialises in the teaching and learning of science and biology with a strong interest in bioethics education. Prof Conner currently supervises a range of Masters and PhD theses on learning and leadership in a range of education contexts.
Contact Assoc Prof Conner at lindsey.conner@canterbury.ac.nz
